

very thin.

The scientific investigators are nevertheless so much hopeful that in U.S. 'Exobiology' and in Russia 'Astrobiolgy' has been coined for studies of extra terrestrial life.

The Quran justifies such research as it says: "And among his signs is the creation of Heaven and Earth and living creatures that He has scattered through them and He has the Power to gather them together when He wills" (42/29).

With the progress of scientific advancement, more and more miracles of Quran will come to light.

گزشتہ دورہ امریکہ کے دوران

امیر تنظیم اسلامی، ڈاکٹر اسرار احمد کے تمام دروس و تقاریر انگریزی زبان میں ہوئے۔ بالخصوص درج ذیل موضوعات پر امیر تنظیم کے خطاب باہتمام ریکارڈ کئے گئے اور اب ان کے آڈیو اور وڈیو کیسٹ تیار کر لئے گئے ہیں جن کی تفصیل درج ذیل ہے:

1- حقیقت ایمان (What is I'man) دورانیہ 6 گھنٹے

2- نظام خلافت (What is Khilafah) دورانیہ 8 گھنٹے

3- حقیقت جہاد (What is Jihad) دورانیہ 2 گھنٹے

4- حقیقت نفاق (What is Nifaq) دورانیہ 2 گھنٹے

5- حقیقت شرک (What is Shirk) دورانیہ 2 گھنٹے

یہ تمام کیسٹ انجمن خدام القرآن اور تنظیم اسلامی کے مراکز سے حاصل کئے جاسکتے ہیں!

century, and the exact details of what happens inside a mother's womb. "We planted him as a (drop) of sperm in a place of rest, firmly fixed, then We made the sperm into a clot of congealed blood, then out of that We made a (fetus) lump, made out of that lump bones, and clothed the bones with flesh, then We developed out of it another creature so blessed be Allah, the best to create...." (23/14).

Further, "He creates you in the wombs of your mother in stages one after the other, in three veils of darkness" (39/6). These three veils or the three protective coverings are: belly, womb, and the membrane.

These fine details given at a time when there was no scientific learning are found as absolute truths by the latest medical science.

D. TRANSPORT

At the time of Revelation of the Quran, the only mode of transport was through animals, but the things to come were certainly in Diving knowledge as evident from the Quran, "And (He has created) horses, mules, donkeys for you to ride and as an adornment. He has created things of which ye have no knowledge" (16/8).

From automobiles to aeroplanes and what not in future is all according to a Divine scheme of progress.

E. EXTRA TERRESTRIAL LIFE

UFOs have been in the news since late 40's. In 1966, U.S. Airforce asked the University of Colorado to make a study of UFOs. Three years later they produced a report which was nearly fifteen hundred pages long, but there was no definite outcome. Some of the sightings remain unexplained.

In 1973, a group of scientists set up a center in Illinois. Evidence of any visitors from other planets is however still

dull; hypocrite-honest; trecherous-trustworthy; deceptive-dependable; pretending-principled etc.

(iii) The most amazing 'pairs' have come to light through the recent advances in Atomic Physics, which centuries before, Divine Knowledge has predicted under *LA YA-LA-MOON*.

Now we know that all matter is composed of Atoms. The Atom comprises of a positive nucleus surrounded by negative electrons. The electron has an anti-particle called Positron.

The nucleus comprising of Protons and Neutrons both of which are made up of Quarks, which again have further sub-divisions exerting attractive or repulsive forces on each other. In short as the Subatomic Structure studies progress more and more 'pairs' will be known confirming the limitless possibilities under *LA YA-LA-MOON*.

B. FIRE FROM GREEN TREES--OXYGEN

The Quran says: "He Who has produced for you fire out of green trees from which you kindle: (36/80).

At the time of the Quranic Revelation, the common mode of fire was through wood derived from trees. Besides the method of striking fire against steel and flint, there were some kind of trees in Arabia like '*Markh*' and '*Ifar*' which also helped in ignition. But now as we know that there could be no combustion without oxygen; we can better appreciate the significance of FIRE FROM GREEN TREES. Allah in His Divine wisdom has installed a perpetual oxygen plant (through greenery) which by photosynthesis in sunlight go on converting Carbondioxide into Oxygen and as such the real source of all fire is certainly 'out of green trees.'

C. HUMAN REPRODUCTION

Imagine the very low level of learning of the 6th

ownelves and many other things of which they have no knowledge." This idea of 'pairs' has also been stressed in several other verses as: 51/49 ; 53/45 ; 55/52 ; 75/39 etc.

The quoted verse is most important for its extensive meanings and the exhortation of "*La ya-la-moon*" at the end is of particular significance-expressive of the limited understanding of that generation and heralding newer and newer discoveries with the ever expanding knowledge.

The verse mentions three categories: (i) earth's produce; (ii) "*NUFUS*"- our ownelves and (iii) *LA YA-LA-MOON*, things not known then.

(i) Earth abounds in plants, animals and minerals. In flora and fauna despite innumerable varieties, some sort of 'pairs' are so very apparent. Similarities and disparities in size, shape, color etc., present a bewitching spectacle.

Minerals have their own diversity: metals and non metals, among metals soft as lead and hard as iron/steel; among non metals cheap as coal (carbon) and precious as diamond (carbon again) and so on.

Besides the material things, life on earth is sustained by various interacting processes with opposite characteristics: oxidation-reduction; analysis-synthesis; heating during day-cooling in night etc.

In the electrical and magnetic fields, the positive and negative charges and North and South polarities are perfect pairs - the more you ponder the more pairs will come to mind.

(ii) In humankind, besides the main pairing of males and females, their body structure: lean-fat; short-tall; handsome-homely; vigorous-weak are so very apparent.

Similarly in human traits and temperaments such obvious biformity as brave-timid; generous-miser; brilliant-

THE MIRACULOUS QURAN

By: Muhammad Iqbal Abbasi
(New York)

All prophets have invariably been blessed with miracles: She-camel of Saleh, the Rod of Moses and the curing powers of Jesus readily come to mind. Their miracles ended with them.

Muhammad (SAWS) is the last of Prophets, he has been blessed with a lasting miracle, the Quran. Let alone its linguistic excellence, the challenge of matching even a single verse yet remains open; it also has the unique distinction of being the only Scripture free of slightest change ever since its revelation and its original text is preserved in its pristine purity. It is the only Book on earth which is retained by heart even by small children, not well versed in their own mother-tongue, yet capable to recite the whole Quran verbatim in fulfilment of the Divine guarantee to guard it against any corruption (15/9).

Miracles of Prophet Saleh, Moses, and Jesus, befitting their times, were of physical nature. In keeping with this age of learning and scientific advances, the Quran stands supreme as an intellectual miracle. The entire intent of its words is quite unfathomable, "If the ocean were ink for the words of my Lord, sooner would the ocean be exhausted than the words of my Lord, even if we add another ocean like it for its aid" (18/109). Besides the obvious and apparent meaning of literal translations of its words, their deep inherent and potential subtleties are gradually becoming discernible as human knowledge advances, as will be borne out by examples, such as:

A. 'ZOGEN' OR 'PAIRS'

Verse 36/36 reads: "Glory to Allah, extended beyond all, Who created in pairs, earth produce, as well as their
