.

Abstract:
There is a common misconception about the rights of assets that men and women possess and it must be addressed in order to safeguard the rights of belongings for everyone in Islam.It is assumed that proprietorship belongs only to man and women cannot own anything in terms of assets or property.This is entirely a false concept as Islam has given equal rights to man and women regarding wealth, property etc.women can manage to buy or sell the assest she possess and she is not bound or accountable to anybody for it(Al-Nisa(S:4). 07 and 32)Similarly another misconception is about the earnings of Man and women it is believed that women cannot earn but Islam provides rights to women to acquire her provisions, she can earn independently and

Women has always whatever she earns belongs to her. suffered discrimination when it comes to the rights of men and women, whenever this society gets an apportunity she has been denied of her actual status, prejudiced and cornered.The double standards of Governance in Pakistan have always made a mess and created confusion whenever it comes to the rights of women. We have to get over with the inequalities that are prevailing in our societyt as Islamic stat clearly defines the rights of every citizen whether man or woen in terms wealth and property

Keywords:property,societyt,Islamic statterms,rights,confusion، property
